

PIOTR MACHYŃSKI

Data Scientist and Analyst Internship

PERSONAL PROFILE

Ambitious Data Scientist and Analyst with a strong foundation in quantitative research, Python, and SQL. Currently completing a Master's in Information Management and commencing postgraduate studies in Data Science. Proven ability to deliver end-to-end analytical solutions, build interactive dashboards, and optimize data workflows. With extensive leadership experience as an Instructor in the Polish Scouting and Guiding Association (ZHP), I am ready to face new challenges, solve complex problems, and seize opportunities for professional growth within a fast-paced fintech environment.

City: Kraków

SKILLS

- Statistics
- Data Management
- Data Analysis
- Agile/SCRUM
- English C1
- German A2

TECHNOLOGIES

- Programming: Python (Pandas, NumPy, Scikit-learn, TensorFlow, Keras, Matplotlib, Seaborn), SQL (MySQL, MS SQL Server), R (ggplot2, lavaan).
- Analytics & Infrastructure: ETL processes, Looker Studio, Google Analytics 4, Docker, Kubernetes, Git/GitHub, Streamlit.
- Research & Modeling: Relational Database Design (Barker's notation), Machine Learning (predictive modeling), Structural Equation Modeling (BSEM), JASP, MAXQDA.
- Languages: English (C1), German (A2).

SOFT SKILLS

- Logical / critical thinking & troubleshooting
- Customer management and phone/written support capabilities
- Passion for learning & strong communication skills
- Cross-functional team collaboration
- Leadership & Organizational skills
- Professional approach to duties
- Commitment to self-improvement and achieving ambitious goals
- Adept at leveraging GenAI tools to optimize data workflows

EXPERIENCE

Data analyst

ZHP Research Institute | 2025 – Present

- Conducted exploratory data analysis (EDA) of quantitative data for a nationwide social engagement study of ZHP members, utilizing MS Excel to identify key trends and patterns
- Conducted qualitative content analysis research by developing and deploying an interactive web application using Python and Streamlit

Instructor

Związek Harcerstwa Polskiego | 2021 – Present

- Managed a scout team for 4 years and a rover scout team for 1 year, overseeing daily operations, annual activity plans, and team finances.
- Served as Camp Commander on 5 occasions, coordinating the work of a 12-person instructor team.
- Organized educational programs, managed budgets, and ensured documentation compliance with the standards set by the Board of Education.
- Completed numerous training courses regarding education, camp organization, and staff management.

Vice President

"Zaintrygowani" Science Club | 2025 – Present

- Acted as Project Manager for functionality testing of a local scout organization's website.
- Organized tutoring sessions to supplement peers' knowledge of statistics in data and information analysis.
- Analyzed the science club's documentation for compliance with formal requirements.

EDUCATION

AGH University of Krakow

Postgraduate Data Analysis- Data Science | 2026- Present

- Start in October 2026

Jagiellonian University

Master's in Information Management | 2025 – Present

- Currently authoring a Master's thesis investigating the impact of information culture on the acceptance of implemented information technologies using Bayesian Structural Equation Modeling (BSEM).
- Completed a project simulating a study of the information culture within the ZHP Kraków-Podgórze district using R.

Jagiellonian University

Bachelor's in Information Management | 2022 – 2025

- Conducted a comprehensive end-to-end analytical process: from exploratory data analysis (EDA) and visualization (Matplotlib), through feature engineering (One-Hot Encoding), to predictive model training and evaluation.
- Completed an internship at the UJ Foreign Law Schools Coordination Center, responsible for creating a digital database of physical academic publications. Also initiated and implemented an automated metadata extraction process from the Internet, significantly optimizing workflow and streamlining data collection. Additionally, designed a relational database diagram compliant with Barker's notation to facilitate future system optimization
- Authored a Bachelor's thesis on Information Architecture and an empirical analysis of ZHP's information system regarding the management of educational staff credentials.
- Collaborated within a SCRUM team to develop a prototype for the "FitDog" application.
